

Agents that give clinicians, coordinators and scientists their hours back, with clinical sign-off and audit trails designed in

Vikram Jha · Principal FDE · AI Architect · Builder · 15+ years in production AI · Co-Founder at a US-based native-AI startup in stealth mode, working on AI governance, agentic security and context graphs.

WHY NOW

Published results now show documentation time recovered at scale ([The Permanente Medical Group](#)) and regulatory writing cut from weeks to minutes ([Novo Nordisk, vendor-published](#)), while staff shortages and network expansion raise the cost of every manual handoff.

WHAT I DO

I work inside your team and build the whole stack with your engineers (context, models, agents, evaluation, security, deployment), prove it against your own baseline, and leave it running in your environment, owned by your people. If AI is not the answer, I say so in writing.

THE FOUR DELTAS, EACH WITH THE NUMBER THAT PROVES OR DISPROVES IT

1 One owner, full stack

Architecture, build and governance in one accountable person; no handoff loss

MEASURED BY Handoffs removed; days from question to decision

2 An evaluated slice in weeks

A working, measured slice of one workflow in 3-4 weeks of data access

MEASURED BY Weeks to a slice that meets its written threshold

3 Governance built in

Authority bands, permission receipts, red-team and a tested kill path before go-live

MEASURED BY Share of agent actions with an authority receipt

4 Open-source cost and sovereignty

Open-weight models wherever blind evaluation shows parity; data in-region

MEASURED BY Cost per resolved case against the frontier baseline

WHERE TO START

A FIRST SLICE I WOULD PROPOSE

MEASURED BY

SHAPE

Ambient documentation pilot

After-hours charting minutes

Production slice sprint (4-8 weeks)

Prior authorization and appeal packets

Days to decision

Production slice sprint (4-8 weeks)

Diagnostics turnaround control tower (non-clinical)

Turnaround breaches

Production slice sprint (4-8 weeks)

WHAT YOU CAN HOLD ME TO

48 h

From your reply to a 30-minute scoping call

1 week

From a signed scope note to the first working session

3-4 wks

From data access to a first evaluated, working slice

2 days

Working days from any session to its written summary and next decision

WHAT OTHERS HAVE PUBLISHED ABOUT THEIR OWN RESULTS

- **Permanente Medical Group:** [1,794 working days of documentation saved in a year](#)
- **Novo Nordisk (vendor-published):** [clinical study documentation from 10+ weeks to 10 minutes](#)

Self-reported or vendor-published, linked; they show what is achievable, not a prediction for you.

WHY ME

- Pucho, an Indic voice assistant (2014-2020): 40,000 hours of speech data augmented to about 600,000
- Generative drug design (2020): three COVID-19 candidates approved by NIV Pune for pre-clinical trials
- Twelve engagement shapes, from a 10-day diagnostic to a retained design authority
- Published reasoning on production agents at vikramjha.work/writing

NEXT STEP

A 30-minute scoping call, within 48 hours of your reply. Tell me the workflow or the stalled pilot; the written summary follows within two working days.
